Profile

During my final year internship, I gained hands-on experience in software architecture, scalable system design, and collaborative development. Passionate about data processing and AI model optimization, I am seeking a junior software engineering role to apply my skills and grow in a dynamic environment.

Technical Skills

- **Languages:** C, C++, C#, Java, Python, JavaScript, TypeScript, HTML, CSS, PHP, Dart
- **Frameworks:** ReactJS, NodeJS, ExpressJS, Symfony, JEE, Spring Boot, Angular, Flutter, TensorFlow, PyTorch
- **DevOps & Cloud:** Docker, Kubernetes, GitLab CI/CD, Azure, AWS, Supabase
- **Databases:** SQL, Oracle, MySQL, PostgreSQL, Cassandra, Supabase
- **Tools:** Git, Kafka, Arduino, VS Code, IntelliJ

Experience

Part-time Backend Software Engineer — Auvelisse, Remote Mar 2026 – Present

- Responsible for the development and maintenance of a production backend microservice within a hospitality software platform.
- Designed and implemented business workflows, REST APIs, and database integrations using Spring Boot and PostgreSQL.

Technologies: Spring Boot, Java, PostgreSQL, Docker, REST APIs, JPA/Hibernate

Freelance Software Engineer — GenieOps, Tunisia Dec 2025 – Jan 2026

- Complete refactoring and migration of a large-scale application generated by Lovable: backend/database migration to Supabase, data schema redesign, frontend restructuring, and significant reduction of technical debt.
- Fixed critical bugs, implemented new features, and improved overall application performance. **Impact:** Transformed an unmaintainable project into a structured and performant application.

Technologies: Supabase, ReactJS, PostgreSQL, Refactoring, Data Migration

Intern — Sofrecom Tunisia, Tunis February 2025 – July 2025

- Migrated a monolithic HMI application to a microservices architecture using Spring Boot with centralized security.
- Deployment using Docker, Kubernetes, and GitLab CI/CD.

Technologies: Spring Boot, Spring Cloud, Docker, Kubernetes, GitLab CI/CD, Cassandra

Intern — VERMEG, Tunis 🐙 July 2024 – August 2024

- Fine-tuned Llama-3 8B for medical question-answering with a local user interface.
- Automated a response evaluation pipeline based on feedback.

Technologies: Python, LLMs, Docker

Intern — TAC TIC, Ariana June 2023 – July 2023

Developed a facial recognition algorithm using a Siamese neural network on ESP32-CAM/Arduino.

Technologies: Python, Arduino, ReactJS

Education

National Engineering Degree in Computer Science – ENIT, Tunisia 2022 – 2025

Preparatory Engineering Studies Diploma – IPEIEM, Tunisia 2020 – 2022

Personal Projects

LeadGen Agent - Lead Generation Automation System 🐙

- Developed an AI-based automated system to generate, qualify, and enrich prospects through scraping and data pipelines.
- Integrated LLMs for relevance analysis and personalized email generation, fully automating the prospecting process.

Technologies: Python, LLMs, Web Scraping, APIs, Prompt Engineering

Order Microservice – E-Commerce Project 🐙

- Designed an order management microservice orchestrating product, payment, and delivery services using Kafka for asynchronous communication.
- Implemented RestClient for synchronous communications and data persistence with PostgreSQL.

Technologies: Spring Boot, Kafka, Zookeeper, RestClient, PostgreSQL

Multi-Layer Secure Infrastructure on Azure Feb 2024 – May 2024

Implemented a robust security infrastructure on Azure covering application, network, and data layers.

Configured VMs, firewalls, network security groups, load balancers, and NGINX.

Technologies: Microsoft Azure, NGINX, VMs, Firewalls, Load Balancer

Project Management Website

- Built a project management system using MVC architecture and deployed on WildFly.

Technologies: JEE, MVC, MySQL, Wildfly, Bootstrap

Full Stack Blog Website

- Developed a blog platform with user management, articles, and an admin interface.

Technologies: Symfony, MySQL, Bootstrap

Stock Trading Simulator

- Developed a trading simulator with buy/sell algorithms and portfolio tracking.

Technologies: C++
